

Max's Recycling Adventure

Learn about Max the mayonnaise container's journey through the recycling system.

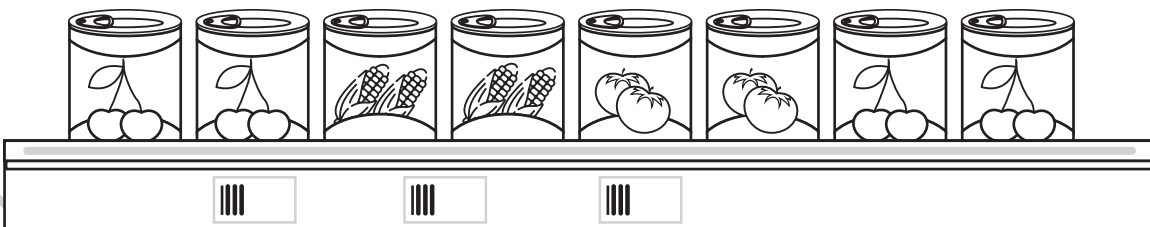

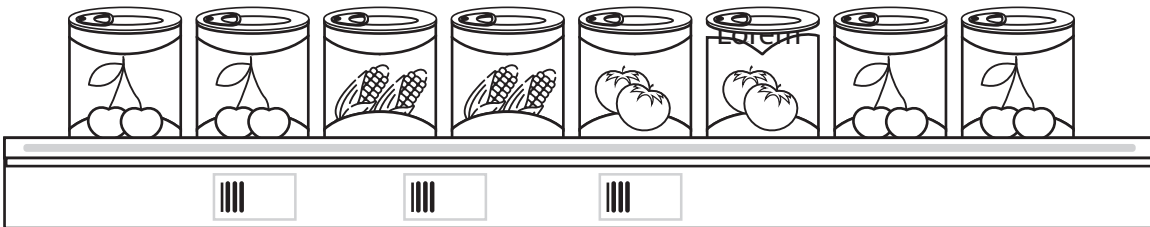

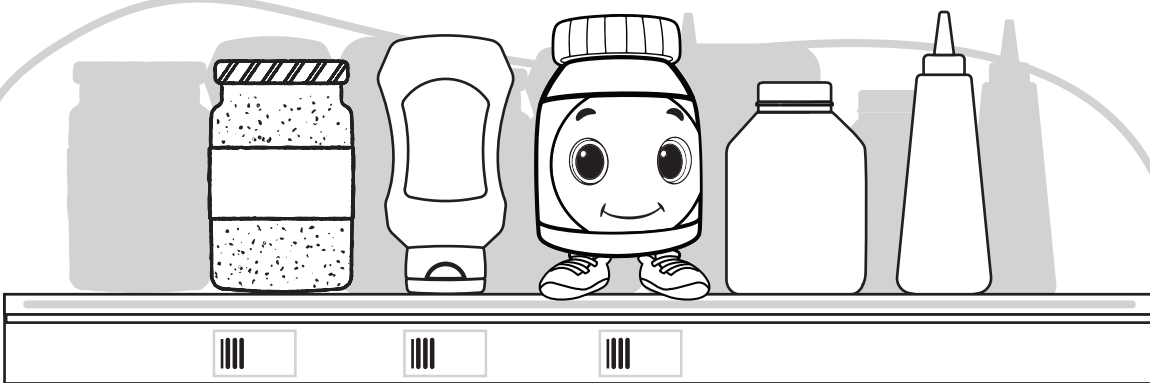

Educational colouring book

I am made of recyclable types of plastics that can be recycled again and again.

My recycling journey starts (and ends) on the grocery store shelf. First I am bought and taken home to enjoy.

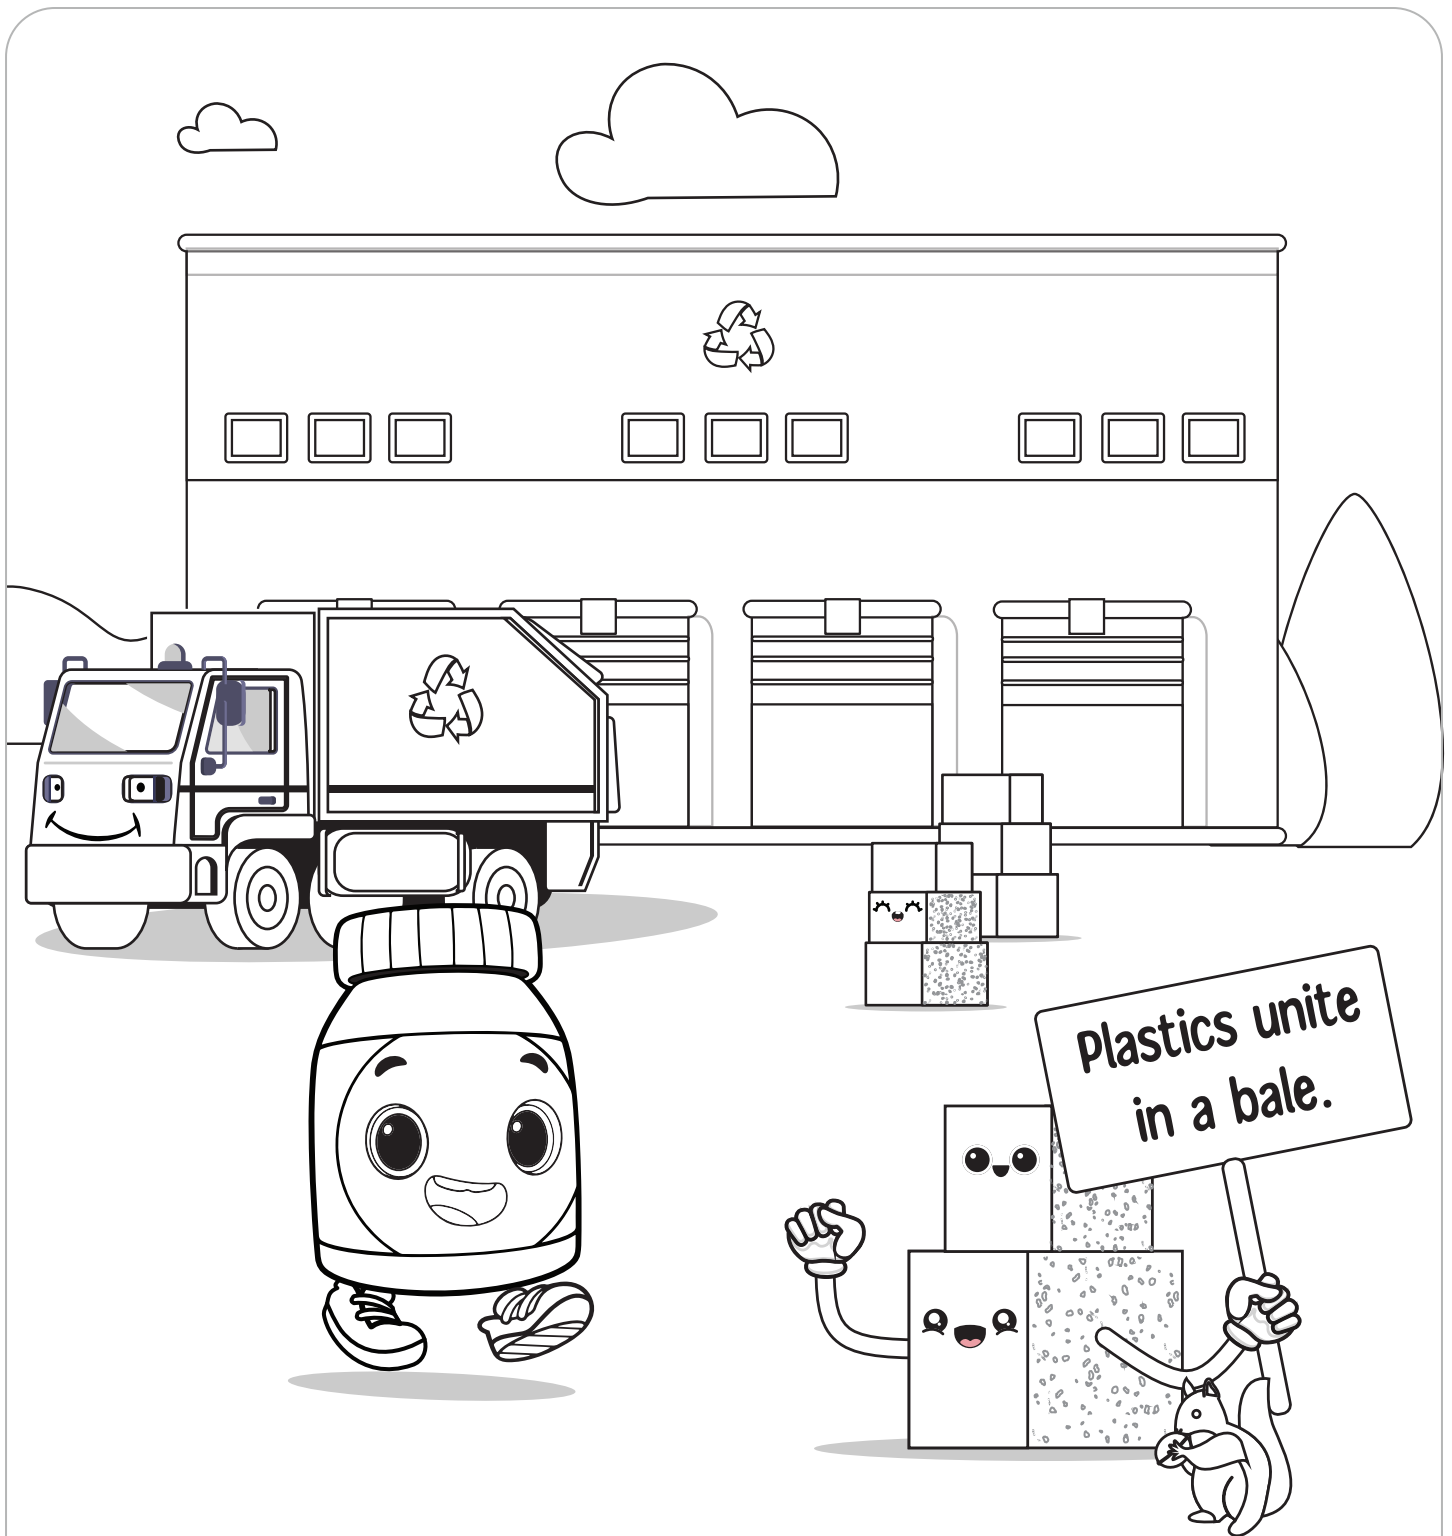

**After I am empty, I am quickly rinsed and put
into the recycling bin.**

**I am put out to the curb on recycling day
and collected by a recycling truck.**

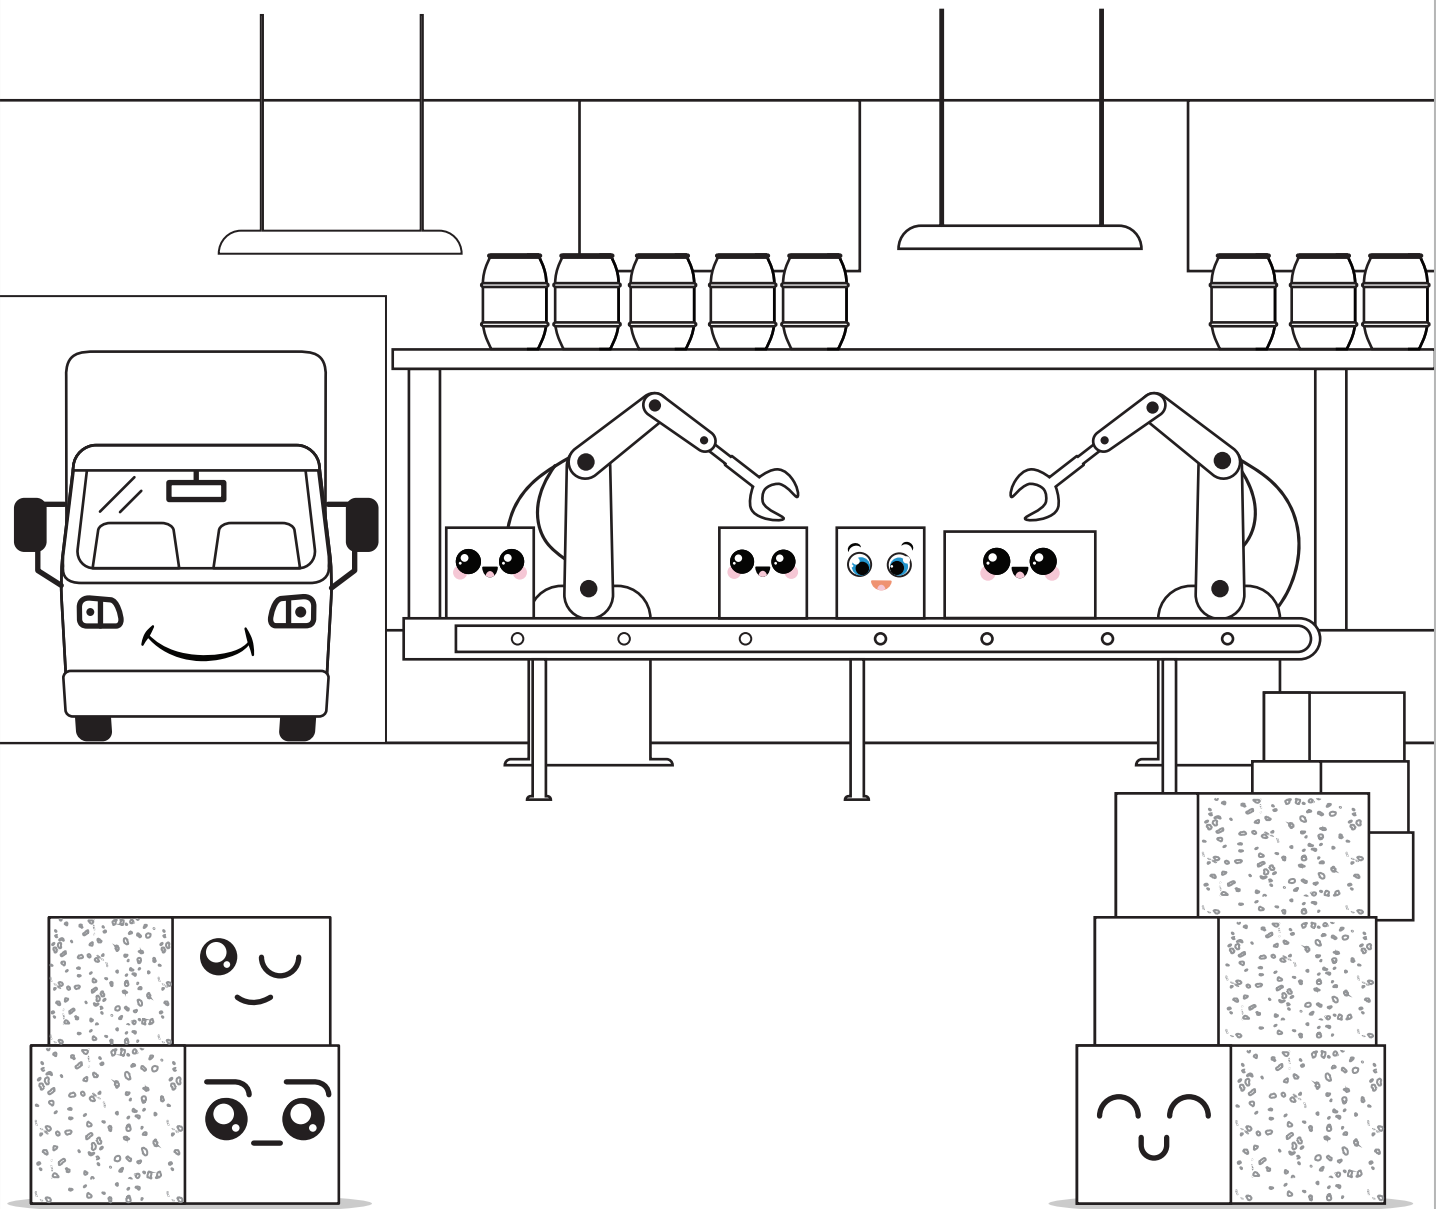

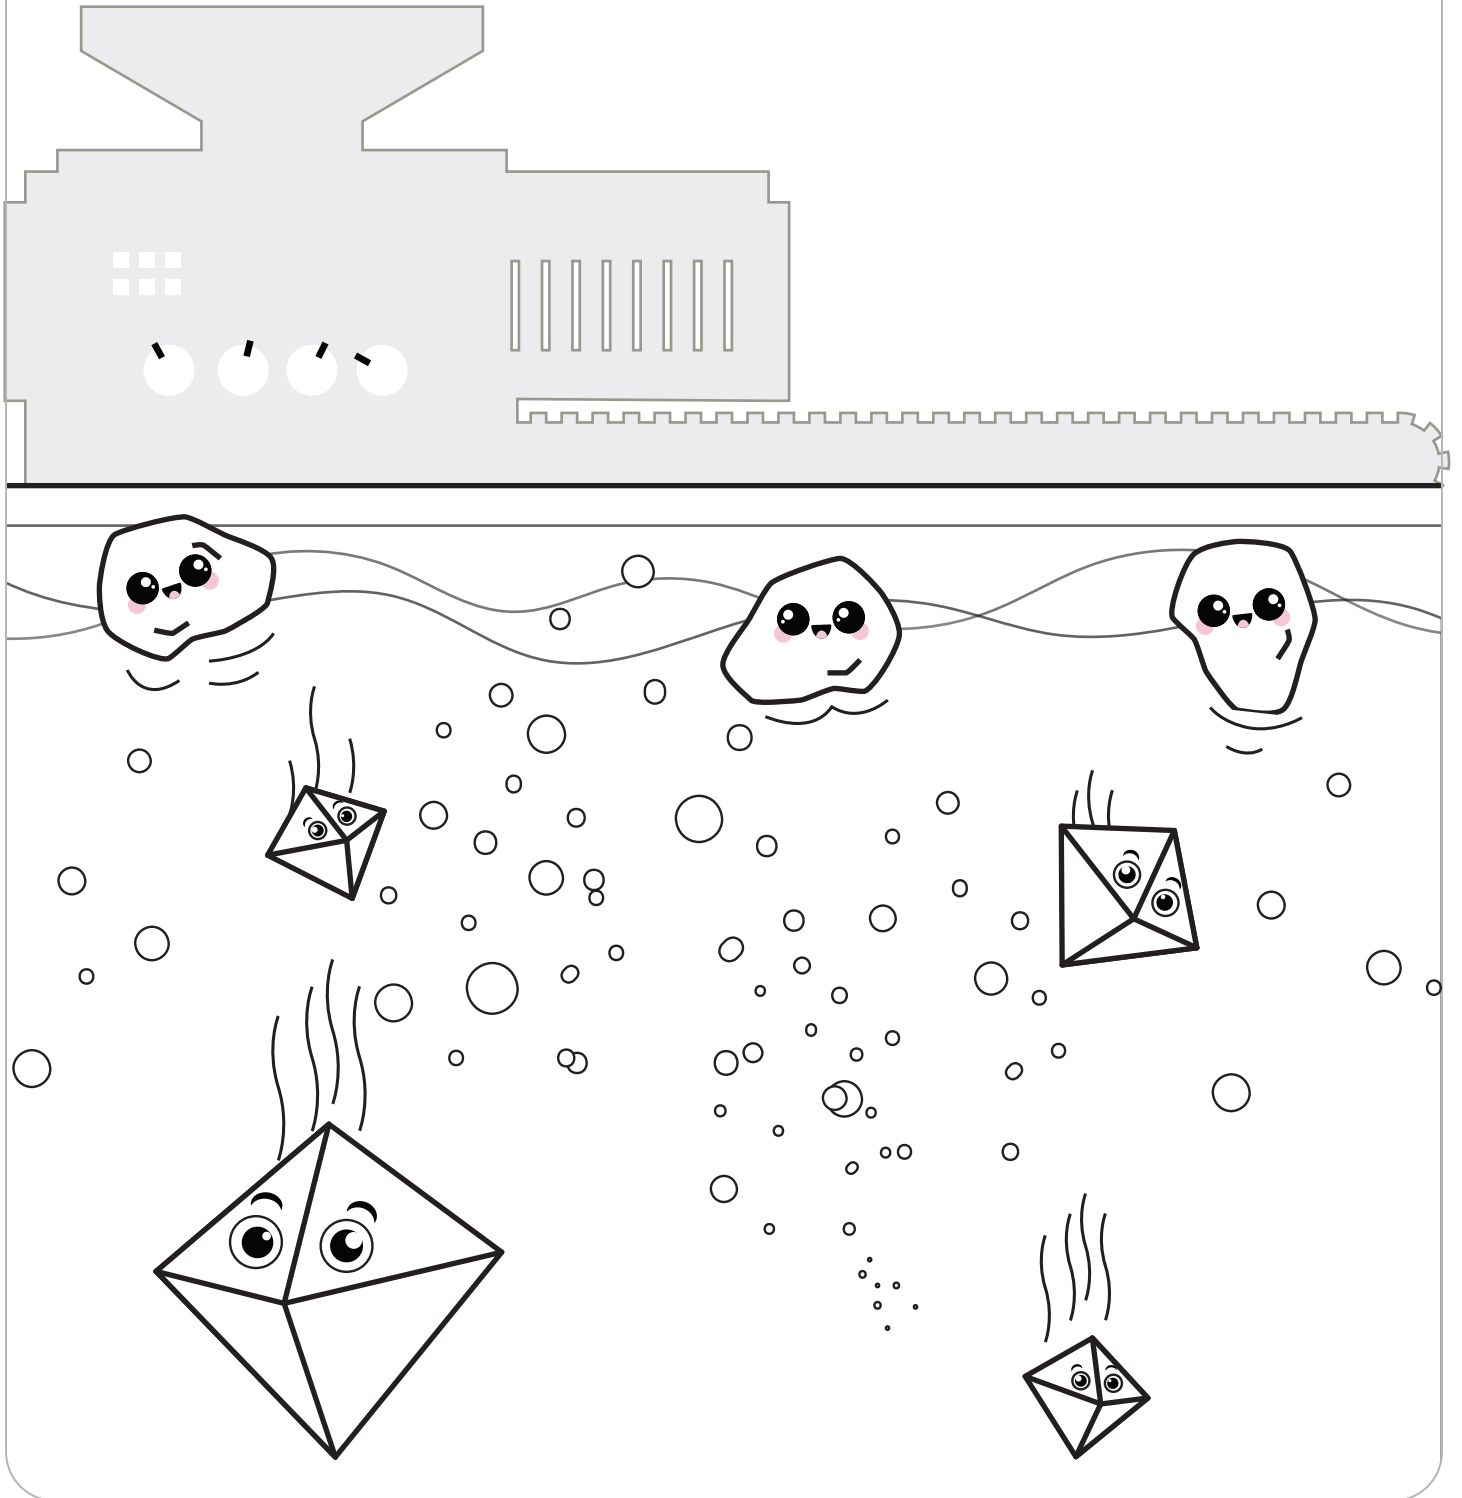

I am brought to a facility where I am sorted and baled with similar plastic containers.

I am then taken to a recycler where the bale I am in is broken apart and sorted again.

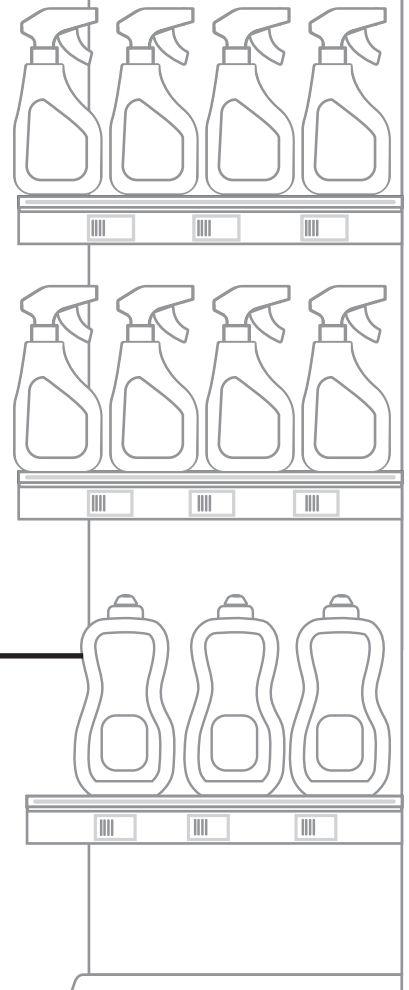

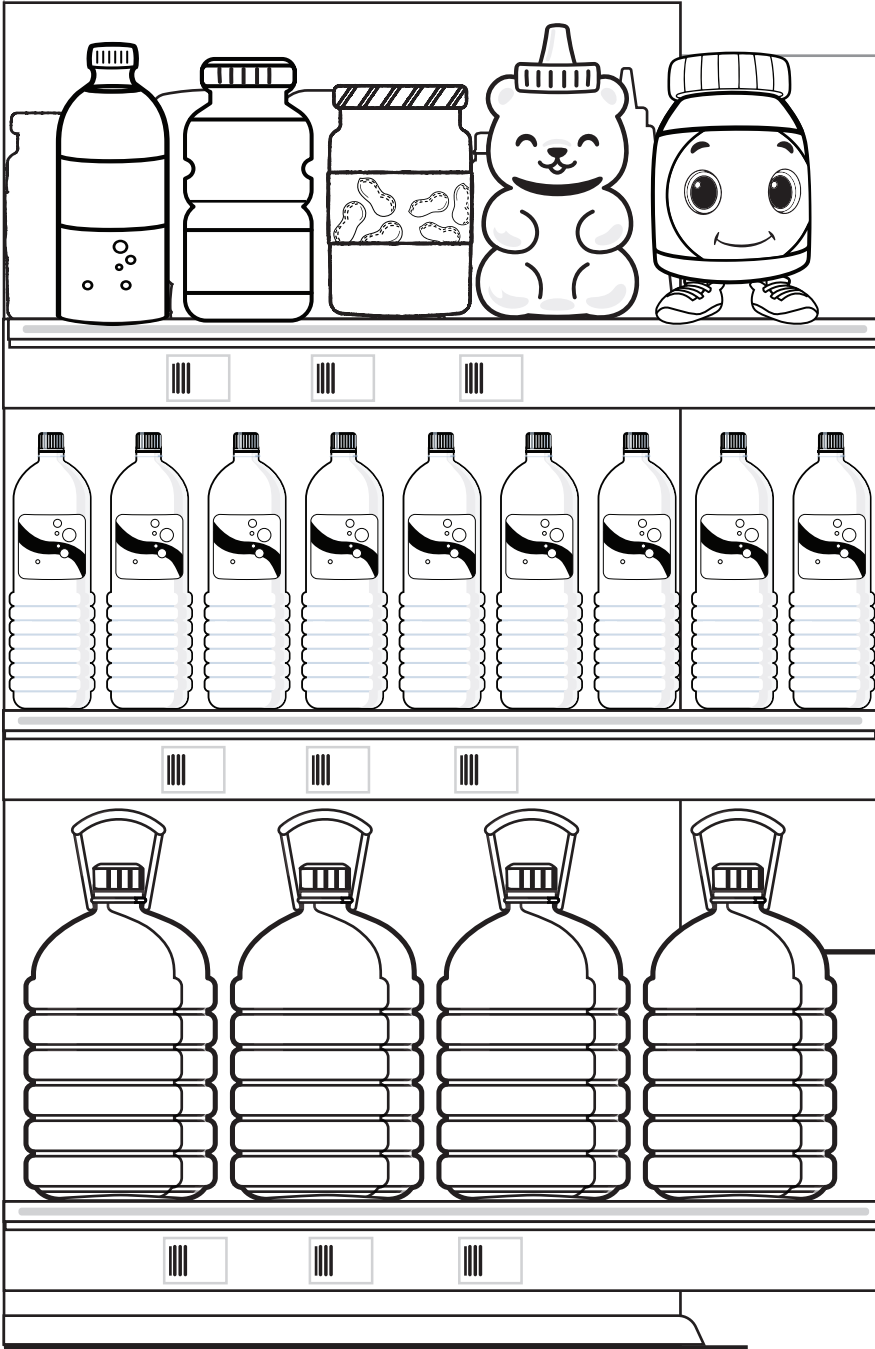

I am made into tiny plastic flakes and given a bath.
Some of me floats and some of me sinks, separating
the different types of plastics I am made of.

I am used to make new products and
placed back on the grocery shelf to start
the recycling journey again!

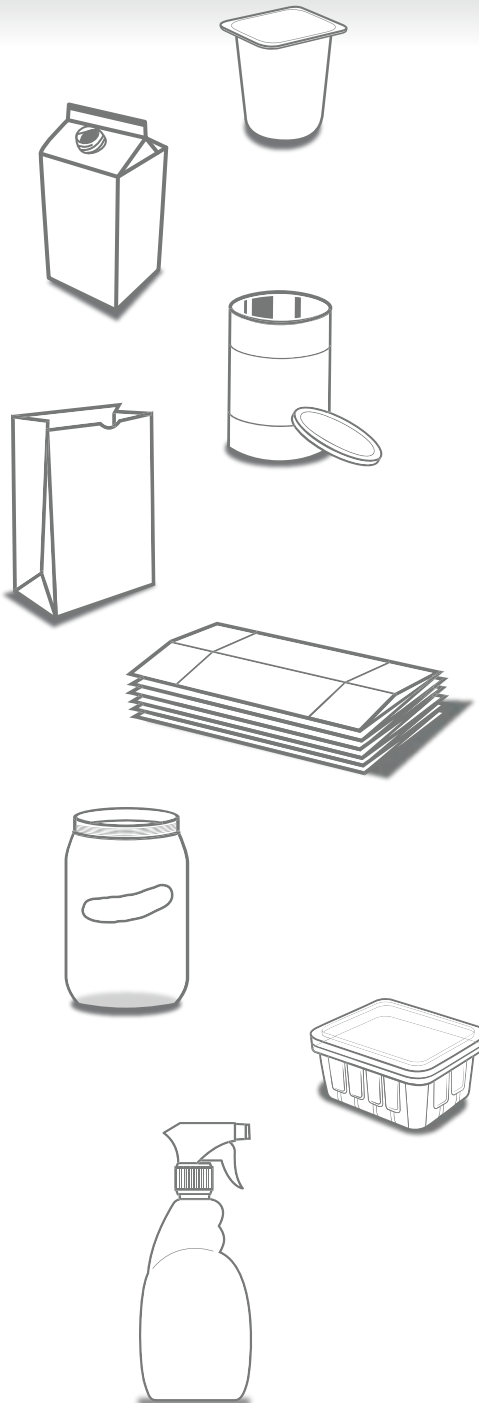

**Some of the
possibilities
I can
become!**

L'Aventure du recyclage de Max

Découvrez Max, le contenant de mayonnaise au fil
de son aventure dans le monde du recyclage

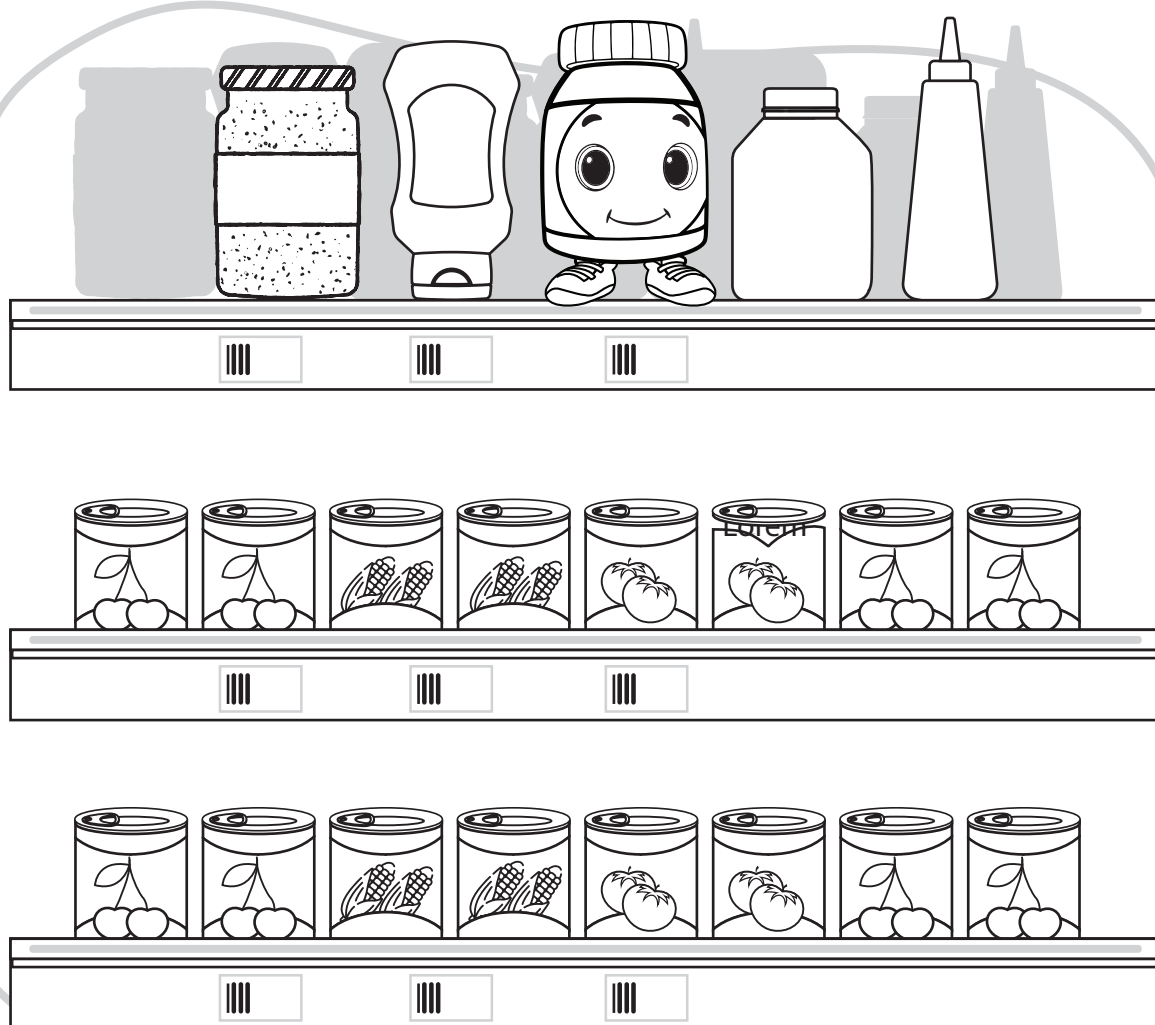

Livre à colorier éducatif

**Je suis fait de différents types de plastiques recyclables
qui peuvent être recyclés encore et encore.**

**Mon aventure dans le monde du recyclage commence
(et finit) sur une étagère d'épicerie. Au départ, on
m'achète, puis on m'apporte à la maison pour
mieux me savourer.**

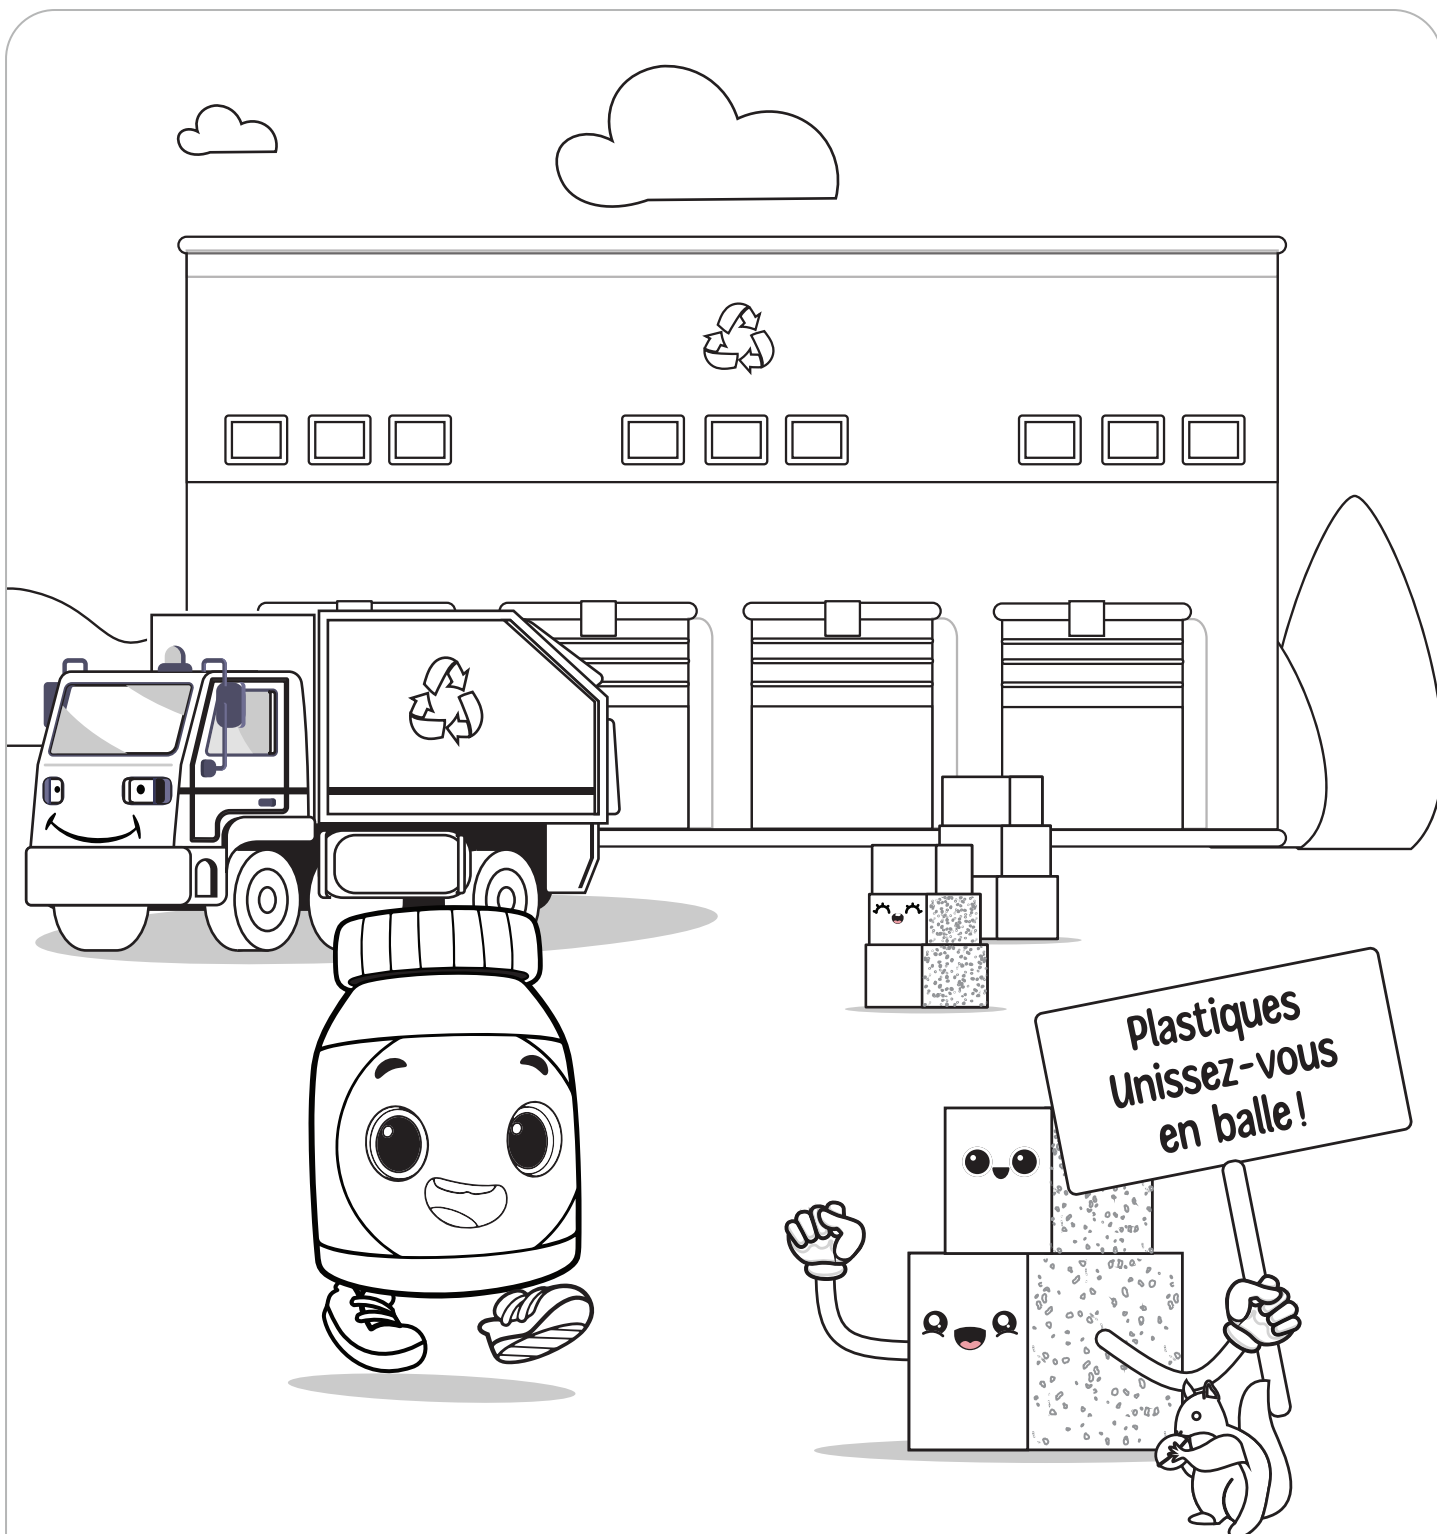

**Une fois vide, on me rince rapidement et on
me met dans le bac de recyclage.**

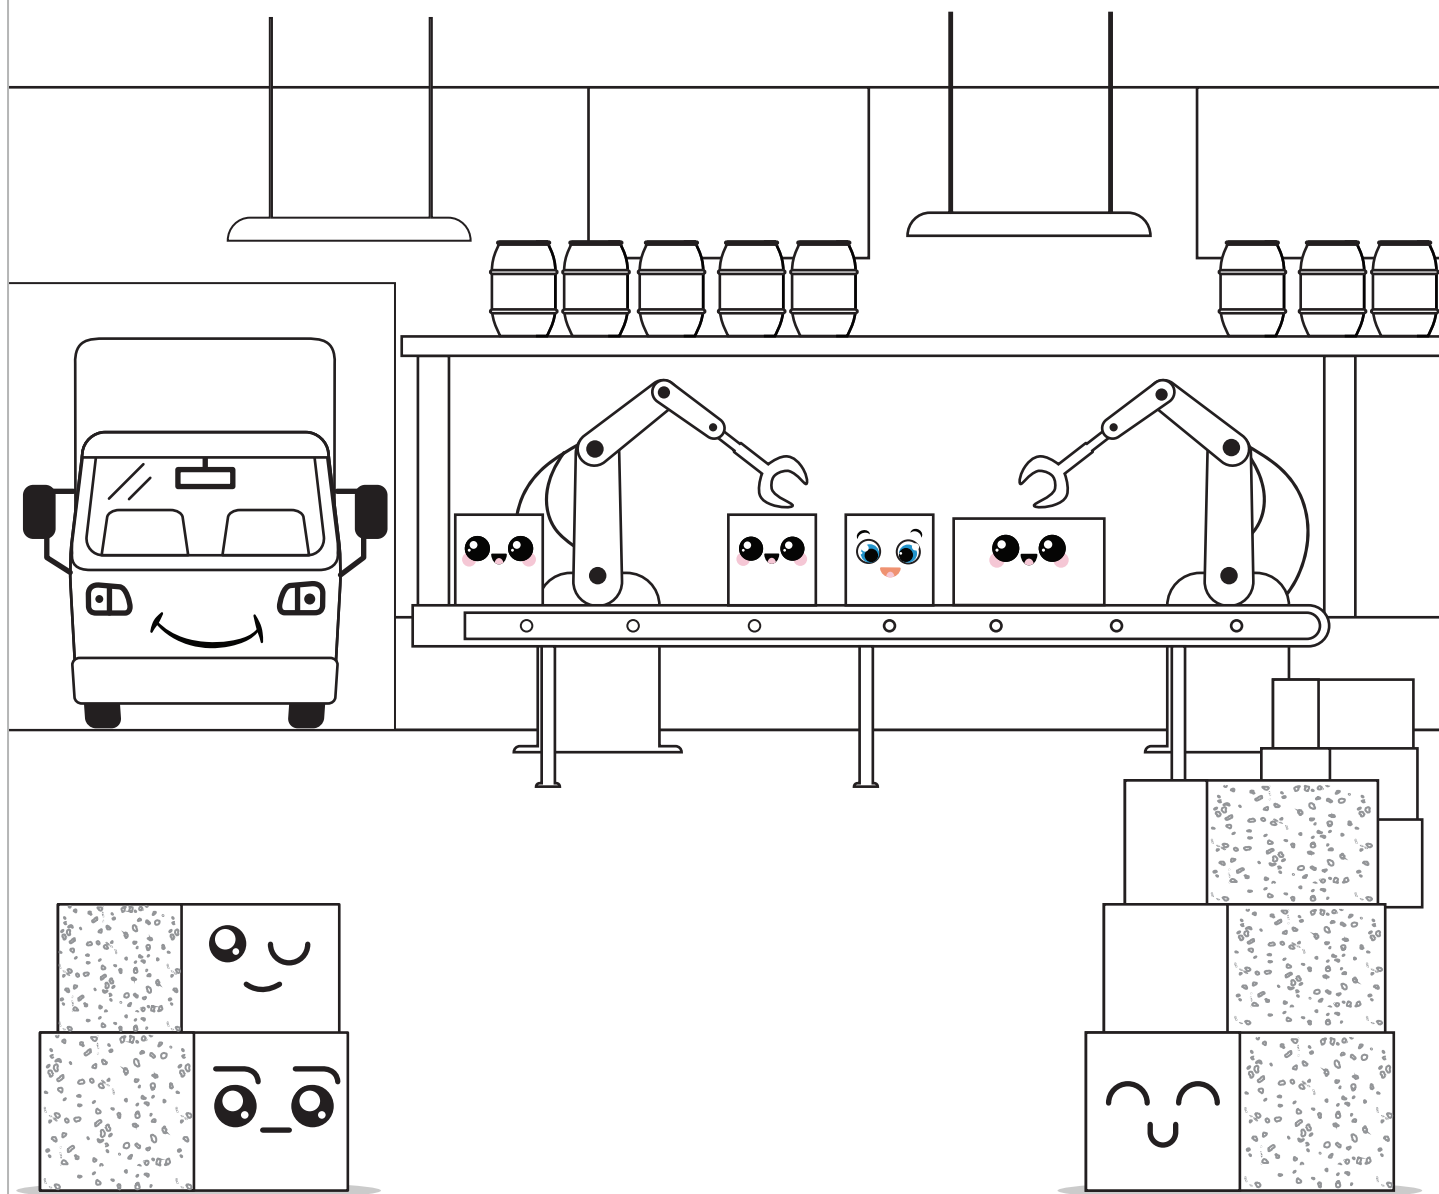

**On met le bac au bord de la route le jour du recyclage,
puis je suis recueilli par le camion de collecte.**

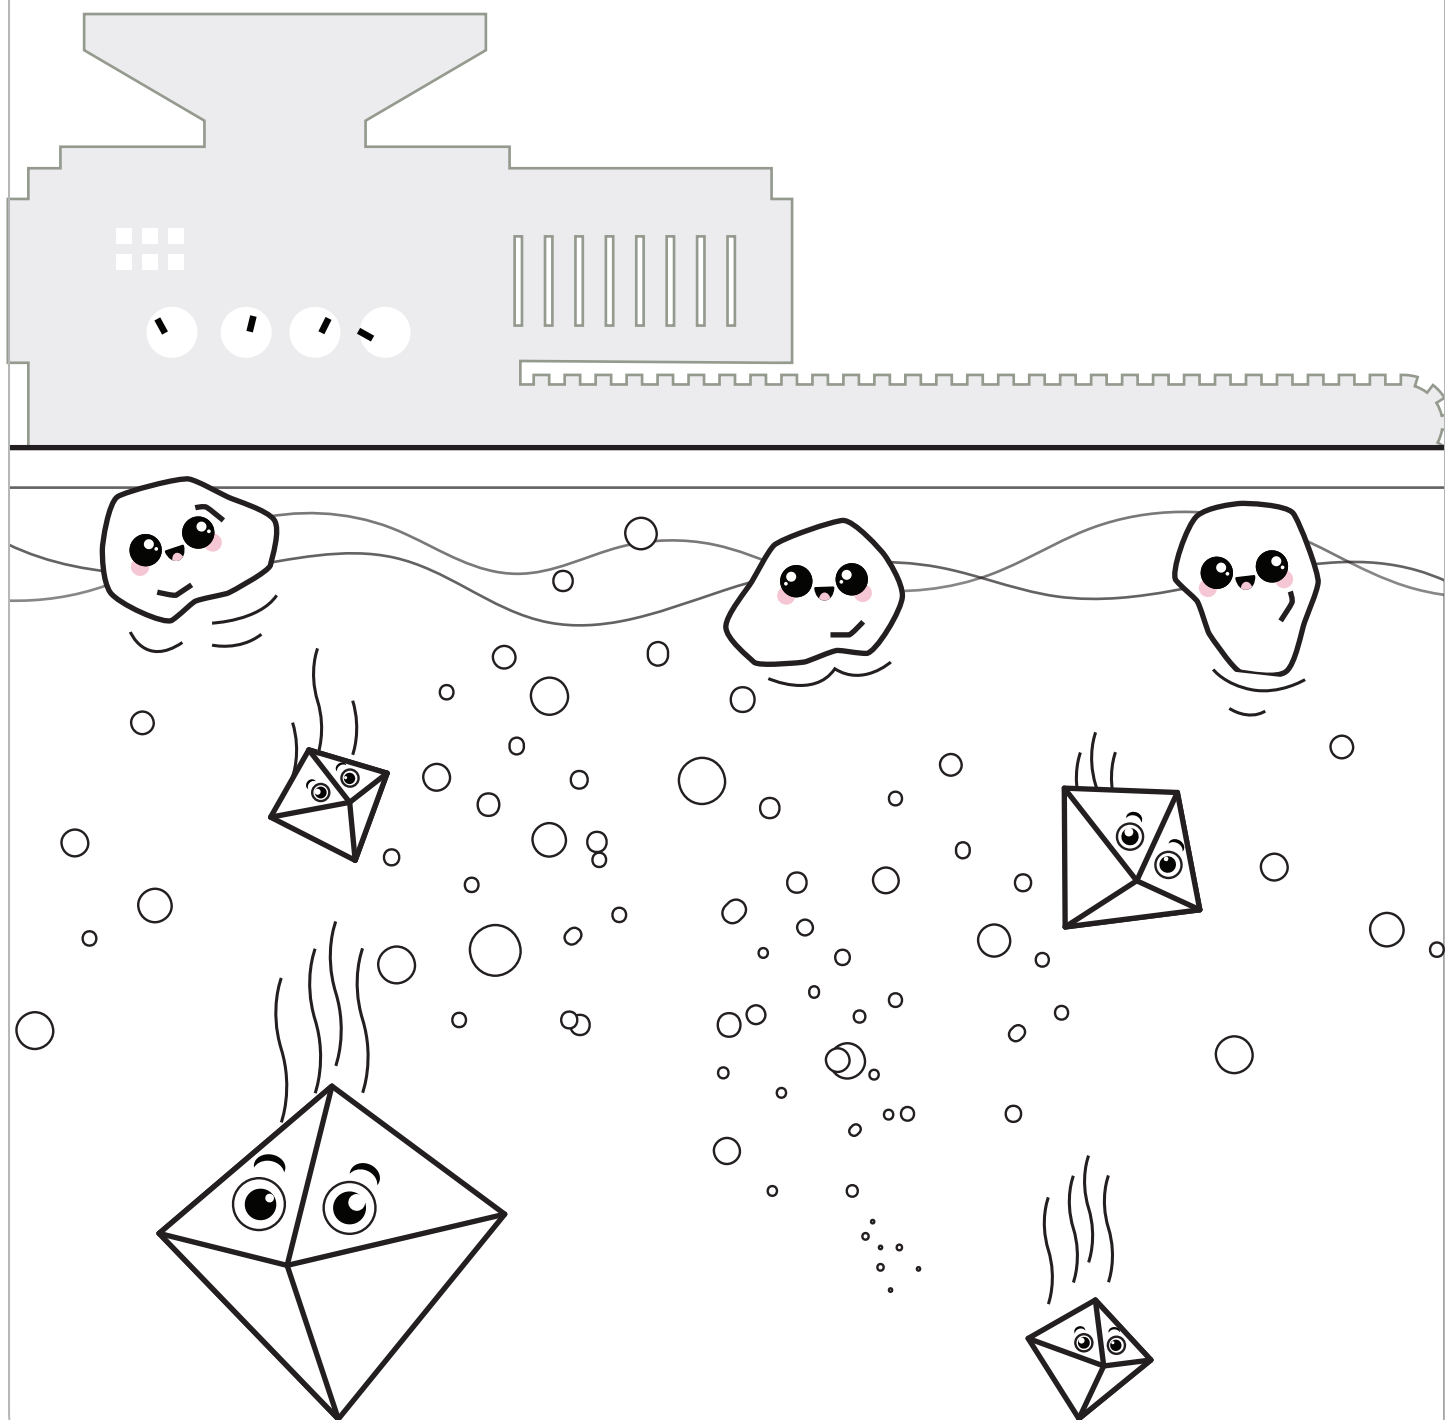

**On m'apporte dans une installation où je suis
trié et mis en balle avec des contenants
de plastique comme moi.**

Puis on m'apporte dans une entreprise de recyclage
où la balle dont je fais partie est défaite
et triée de nouveau.

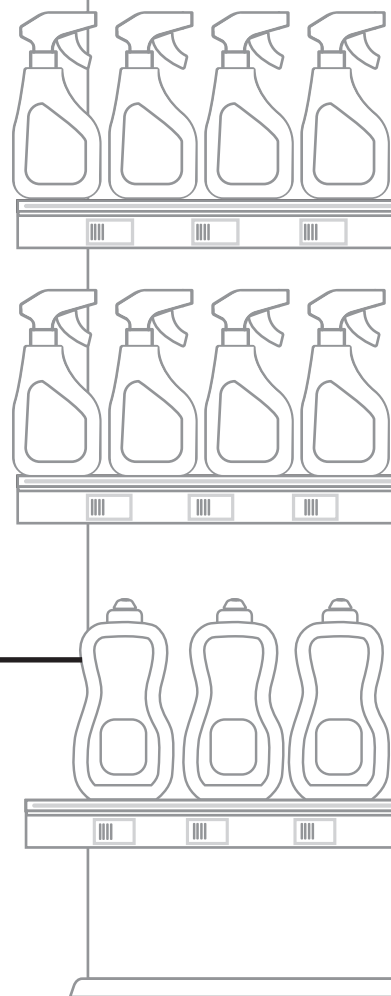

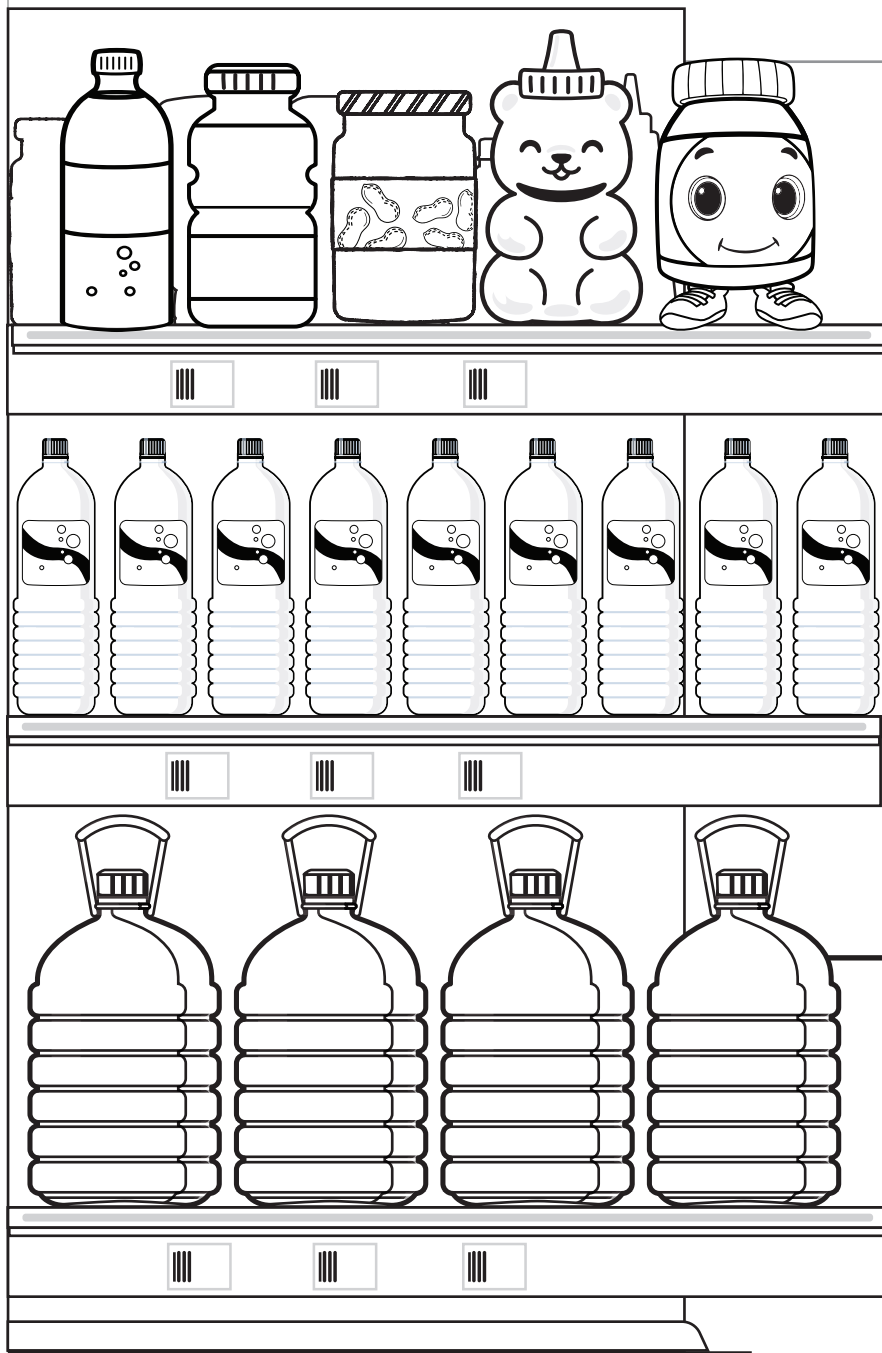

On me transforme en minuscules flocons de plastique et on me donne un bain. Certains de mes flocons flottent, d'autres coulent au fond, ce qui sépare les différents types de plastique qui me composent.

On m'utilise pour créer de nouveaux produits
et on me replace sur une étagère d'épicerie,
histoire de recommencer l'aventure
du recyclage!

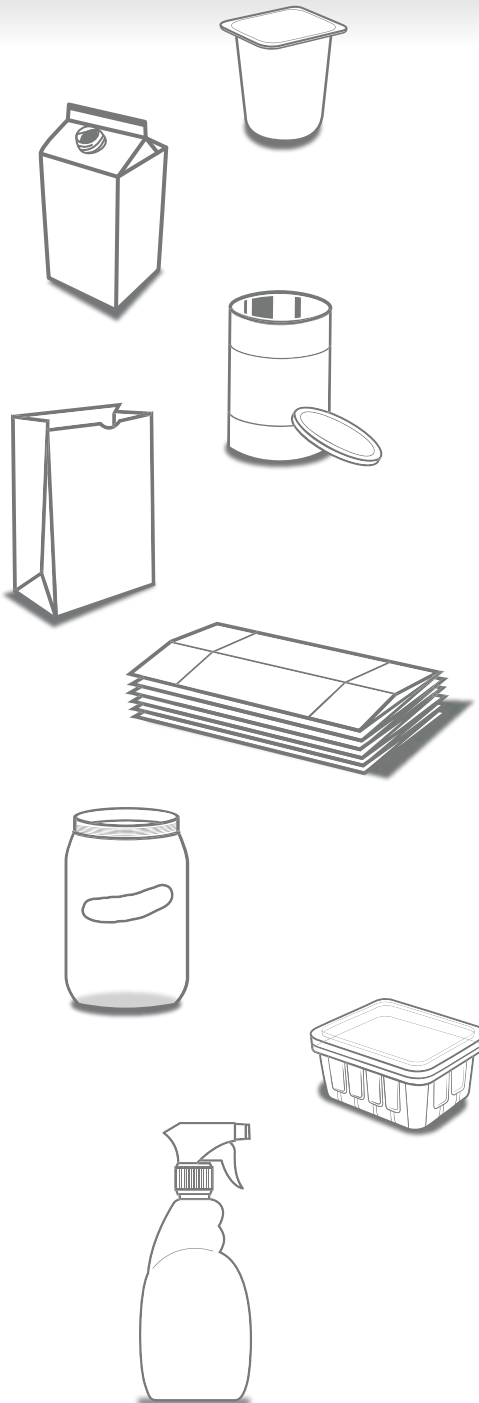

**Voici tout ce
que je peux
devenir!**
